WORK EXPERIENCE

1. Engineer trainee (service desk), Cognizant infrastructure services july2021 - aug 2022
 - Provided excellent customer service by resolving the tickets raised by them before the expected time of resolution
 - Maintained an organized workspace conducive to effective problem solving, maximizing productivity during time-sensitive projects or deadlines.
2. Associate engineer, Cetazean Technology sep2022- aug2024
 - Proactively identified and addressed potential bottlenecks in application performance, resulting in consistently smooth end-user experiences.
 - Contributed to the adaptation of applications such as HBOmax, jiocinema, etc using javascript.
 - Provided support for html5 apps rendered on custom browser built based on chromium.
 - Provided support for HbbTv features like video broadcast and media object in same custom browser built for TV.

PROJECTS

- 1)Mini project on object detection and image segmentation using machine learning in labVIEW.
- 2)Final year project on "Smart Traffic Monitoring System".
